## EXPERIENCE

---

**Start Studio** (formerly Izeni)  
*Senior Software Engineer*

Spanish Fork, UT (Remote)  
Sep 2015 – Present

- Led the development of complex web and desktop applications from initial concept to production deployment
- Collaborated closely with clients to translate business requirements into estimates and technical solutions
- Architected scalable backend systems and REST APIs using modern frameworks and best practices
- Developed and maintained robust, accessible, and responsive frontend interfaces
- Mentored junior and mid-level engineers, fostering a culture of continuous learning and improvement
- Managed multiple projects simultaneously, balancing priorities and adapting to shifting client needs
- Researched and introduced new technologies and best practices to improve team productivity

## PERSONAL PROJECTS

---

### Schedule Builder - Whole Child Therapy

[Case Study](#)

*Django, React, TypeScript, TailwindCSS, shadcn/ui*

Custom web application that streamlines complex pediatric therapy scheduling, dramatically reducing the time and effort required for staff to create conflict free schedules and enables the team to focus on higher level tasks.

- Worked with client to analyze their scheduling workflow, identifying key pain points and requirements
- Architected a data model and REST API to manage clients, technicians, availabilities, and appointments
- Developed a dynamic multi-factor matching algorithm and comprehensive conflict detection/warning system
- Built a custom calendar interface and modern frontend for efficient schedule management
- Optimized backend performance with advanced query techniques and ensured full test coverage

### PunkwebBB

[Case Study](#)

*Django, HTMX*

Standalone, open source Django bulletin board system featuring BBCode/Markdown WYSIWYG editing, real-time shoutbox, role-based permissions, and a modern responsive UI. Designed for easy integration in any Django project.

- Developed a fully self-contained forum app requiring no additional Django dependencies
- Integrated BBCode and Markdown parsers and WYSIWYG editors, supporting rich content creation
- Built a real-time shoutbox and interactive modals using HTMX, with zero JavaScript
- Designed and enforced fine-grained, role-based permissions for users and moderators
- Maintained comprehensive test coverage and documentation for easy adoption and extension

### PunkwebUI

[Case Study](#)

*SCSS*

Lightweight, open source CSS framework offering classless semantic defaults, TailwindCSS inspired utility classes, and essential UI components. It features easy theming with CSS variables, dark mode support.

- Designed and implemented classless base styles for clean, semantic HTML out of the box
- Developed TailwindCSS-inspired utility classes for fast, flexible styling in HTML
- Built a theming system using CSS variables for easy customization and dark mode support
- Created a library of essential UI components (buttons, dialogs, forms, etc.)
- Packaged for use as both a standalone CSS file and npm module for easy integration into various projects

## SKILLS

---

### Backend Development

Python, Django, Node.js, PostgreSQL, Firebase, REST APIs, GraphQL

### Frontend Development

React, Next.js, Angular, TypeScript, Electron, SCSS, TailwindCSS, Vite

### Infrastructure

Docker, Nginx, DigitalOcean, S3, CI/CD, Linux
